Tangiblee delivers immersive shopping experiences for retailers with virtual try-on software built on Microsoft Azure

Tangiblee, an immersive shopping commerce provider, is using Microsoft Azure to change the way people shop online with a virtual try-on solution. Using Tangiblee, consumers can experience fashion, furnishings, and more from anywhere. Through an innovative approach that uses 2D images, retailers can deploy Tangiblee faster and at lower cost than competitive solutions, increasing conversion rates and reducing costly product returns.
